# CYBER SECURITY THREATS & SOLUTIONS

## JOIN US FOR THIS DISCUSSION

- *Examples of attacks and techniques leaving you with a better understanding of their impact and severity*
- *How threat strategies have shifted from looking for a gap in your perimeter or users' traditional phishing susceptibility, to studying you from the outside in order to map and exploit your network of trusted relationships*
- *Building a framework to position your defenses for threats both inside your network, with what you control, and outside of your perimeter, that you can't directly control*
